All entries post through **Acct.Cash.Escrow** (clearing account; net must equal \$0 when balanced).

■ Accounting Guide — Basis & Journal

■ Basis Frame

Gross Acquisition Cost = all Capitalize+Debit items summed (purchase price, title, recording, taxes, surveys...).

The assessor's land % splits the gross into **Acct.Fixed.Land** (non-depreciable) and **Acct.Fixed.Tangible.InService** (depreciable over 27.5 yrs for residential). These are the two fixed-asset entries posted to the GL.

■ Journal Frame

Shows the **exact records** written to llcAssets. Every row clears through **Acct.Cash.Escrow** as the Ledger (counter-account), so the escrow account nets to **\$0** when the journal is balanced — no residual liability.

Fixed asset rows are highlighted **green**. Credit rows (Cash to Close, New Loan, Owner Capital) show the funding source that cancels the escrow balance.

Balance Sheet effect after commit: Acct.Cash.Escrow = **\$0** (cleared) · Acct.Fixed.Land ↑ land amount · Acct.Fixed.Tangible.InService ↑ building amount · funding accounts (Bank / Mortgage / Capital) ↓ by their credit amounts.
